LEATHER
METAL
FURNITURE

The inspirational French phrase, "Sois belle à ta façon"- meaning "Be Beautiful in your own way" is where the true essence of our latest furniture line resonates. "A home which inspires you every day, that makes you feel great, makes you happy and content. A home where you are at your truest, at your best"

And how this symbolises in your visual design, in the way you pick, choose and curate these pieces as a part of your space to tell your and your families stories...

This year we launch an exclusive one-of-a-kind, handcrafted genuine leather furniture collection. The collections celebrate the rich tradition of classic and contemporary design whilst incorporating sustainable practices at its core. Elevated aesthetics, passion for creation and functionality all come together in unity and beauty.

BEDCASTILE

FEATURES

LONGLASTING BASE FRAMES

Our beds come with a base frame as standard which is designed for a long life and are meticulously tested to British Standards.

HIGH QUALITY MATERIALS

Our beds are made of thick gauge steel tubing which are welded and casted into place using traditional techniques. All our material is chosen so that they ensure our beds last a long time and we thoroughly inspect all material that before we use them in our products. Any brass that we use is genuine solid brass castings and pipes rather than steel coated to look like brass.

WOODEN SPRUNG SLAT SYSTEM

Our base frames come with sprung wooden slats which are 20% thicker than slats provided by other manufacturers. The gap between slats is 65mm and compatible with most mattresses available on the market.

TWO HEIGHT SETTINGS AVAILABLE This bed frame comes with two standard frame height configurations, 14" and 17". You can choose the height setting at which you set the bed at the time of assembly. You may change the height setting at a later date if you choose to.

FINISH All our iron beds are painted in a durable powder coated finish that has been tried and tested over the years.

WHAT MAKES OUR IRON BEDS & METAL BED FRAMES SPECIAL

Iron beds are mostly valued for their durability, stylish elegance, cost effective features and versatility. Their ever lasting design means you can pass one down from generation to generation. Cast and wrought iron bed frames were introduced at the end of the 19th century, in the Victorian age. Vintage iron bed frames were handmade from pouring the iron and polishing detailed castings to the last finishing touches. The Bed manufacturer has been working with these traditional techniques for the last 20 years. Till today they produce beautifully handcrafted metal bed frames.

ARE METAL BEDS DURABLE

Iron beds are more portable than other types of bed frames. For people who tend to move often metal beds survive moves better than wooden or upholstered beds. Metal which has been painted with our durable finish is able to withstand more punishment than wood and won't rip like upholstery. Dismantling and assembling our metal bed will, also, not compromise their life in any way.

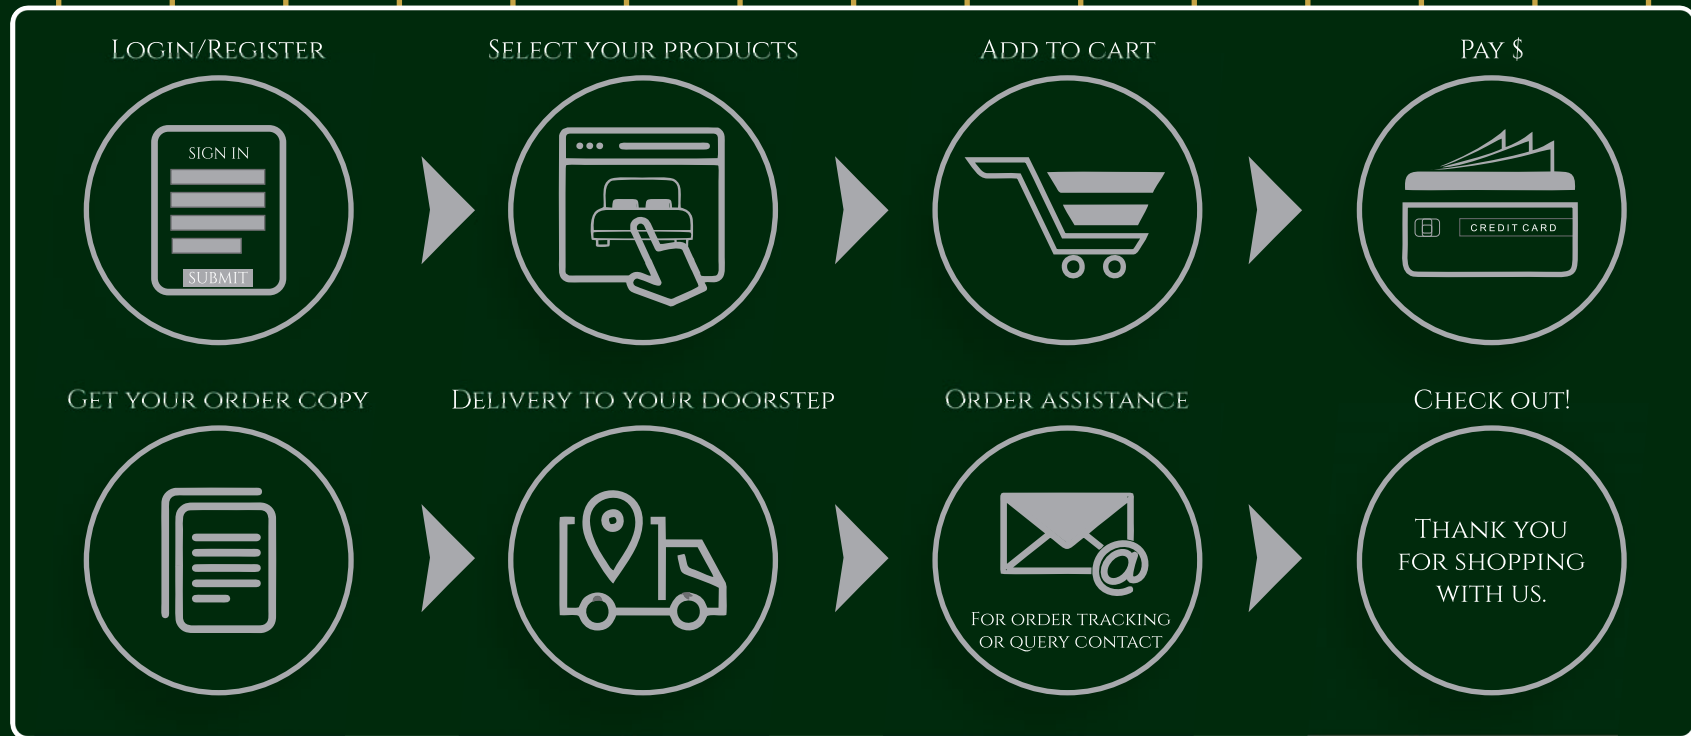

HOW DO I TAKE CARE OF MY METAL BED FRAMES

Maintenance of an iron bedstead is relatively easy, it should be kept clean and as dry as possible. A dry cloth can be used to wipe down the frame every so often to keep it dust free. An iron bed frame will not stain easily and any spills can be easily cleaned with a damp cloth followed by a dry cloth. Tightening the bolts yearly also makes sure it never squeaks.
